

BSK Model 3D Printed Detail Set

1. This product is a high-quality detail up set printed with a 3D printer.
2. This product is printed with a very flexible material.
3. This product has a significantly lower risk of breakage and can be cut very easily with a knife.
4. This product has very small parts. When you cut the parts, be careful not to fly them off.
5. Use Super Glue when bonding parts on the kit.
6. When applying a 3D printed part to a part of the kit, cut and open the 3D printed part for fitting if a part of kit is too large to fit.
The 3D printed parts are more flexible than you imagine.
7. This product can be applied to a variety of kits.
Please assemble it with reference to photos or parts of the model kit being manufactured.
8. This product consists of only 3D printed parts. PE and any other parts are not included.

Most of the parts can also be used in Early and Mid of Hetzer

Exhaust and Bracket parts are included in this set
